Call To Action!

HELP! We have a serious problem and need the help of all concerned veterans. Please share!

WE NEED YOU TO CALL YOUR TWO SENATORS ON MONDAY TO SUPPORT NAVY VETERANS DYING OF AGENT ORANGE RELATED DISEASES.

The ship bill is in jeopardy. It was amended to the [National Defense Act](#) and will be worked on any day. We cannot afford to let this die. If passed it will reduce the cost of HR 543 to a passable bill. The first and

most important thing action you can take is on Monday morning to call your 2 senators to request they pass this amendment ([Section 1062 of Senate Bill 2410, the National Defense Authorization Act for Fiscal Year 2015](#)).

Here is the story. Section 1062 of Senate Bill 2410, the National Defense Authorization Act for Fiscal Year 2015 contains a requirement that the Navy pinpoint the closest approach to land for all ships deployed to Vietnam. This will allow the crew of any ship that entered the rivers or tied up to a pier to receive the presumption of exposure to Agent Orange and increase the chances of these who entered bays such as Da Nang Harbor to receive that presumption. This measure has passed the House of Representatives twice in two different bills.

The Navy is fighting back saying that they do not want to do the study because it would cost \$5 million. Our experts disagree and notes that the Navy has inflated the number of log pages that would have to be reviewed.
